Warranty Policy- General Summary

ADI, Inc. (ADI) warrants that all Mobile Health Clinic (MHC) build-outs and installation or modification of the individual build-out equipment and components shall be free of defects in materials and workmanship under normal intended use for a period of one year from the date of vehicle ex-factory ship out. ADI's Mobile Health Clinics are sold as installed turnkey units, without any additional warranty expressed or implied by ADI. All other components, including but not limited to chassis, body, dental or medical equipment, will be covered by the original manufacturer's warranty as stated below.

Each individual manufacturer's warranties and corrective policies and procedures prevail for each individual respective product. As the installer of equipment and components that are warranted by the various respective individual original equipment and component manufacturers, those warranties pass through ADI to the purchaser of the MHC. ADI does not "control", "extend", or "delay" any individual original manufacturer's component's warranties. Most equipment manufacturers require warranty registration within 10 days of delivery. **Please send in all of your warranty registration cards as soon as you receive your mobile clinic or your warranties may be invalidated.** Any dental equipment provided by a local dealer should be serviced by the providing local dealer. Check with that local provider concerning warranty registration requirements for that provided equipment.

Mobile Health Clinic purchasers are **required** to contact ADI **prior to initiating any repair based on a warranty claim.** After evaluation, ADI will authorize and issue a **capped purchase order** to the MHC purchaser or an approved service center for the labor and parts required to complete the warranty repair. **ADI will not pay for unauthorized outside labor performed by any third party service center or dealer, or pay for any unauthorized parts provided by any third party service center or dealer.** ADI provides warranty or non-warranty service on mobile clinics only at ADI's facilities in Tualatin, Oregon.

The following warranty summary list includes various equipment and component manufacturers that may have provided equipment and components in the build-out of your MHC. The mobile clinic owner is to contact the individual equipment and/or component manufacturer directly with service or warranty issues. Call ADI Technical Service before contacting the manufacturer so ADI may assist you in troubleshooting the problem and in obtaining local service if necessary. Re-training for new staff or drivers is available from ADI by appointment for the cost of air fare, travel and hotel expenses.

For other dental equipment items contact the manufacturer directly.

NOTE: Most dental equipment manufacturers warranty **parts only**; labor fees are generally not covered.

Please check with each individual manufacturer to determine what is covered under their warranty.

Most of the above equipment manufacturers require warranty registration within 10 days of delivery.

PLEASE SEND IN ALL OF YOUR WARRANTY REGISTRATION CARDS AS SOON AS YOU RECEIVE YOUR MOBILE CLINIC OR YOUR WARRANTIES MAY BE INVALIDATED.

Failure to follow all equipment maintenance guidelines and instructions may result in invalidation of your warranty. NO vehicle, Gen-set, vacuum system, or dental equipment is any better than its maintenance. Please read ALL of your instruction manuals in your Winnebago briefcase and in your MHC As-Built Binder. Follow the recommended maintenance procedures including checking and changing batteries on the Carbon Monoxide and smoke detectors, as required. The lack of maintenance is by far the number one reason for all mechanical components' failures. You must do your part in providing the needed timely maintenance of the mechanical components, especially changing the oil in the vehicle and generator. Please reference the ADI Mobile Clinic Maintenance Check List #1 for your mobile health clinics maintenance guidance.
