

Designers and Manufacturers of Mobile Health Clinics

Why ADI Mobile Health?

ADI Mobile Health design, build-out, customization and service features:

- ADI Mobile Health Clinics provide a positive and efficient work environment for your staff and patients.
- With our extensive dental and medical experience, ADI is able to provide practical and efficient layouts, allowing for the optimum use of space. Our goal is a positive, fun, and functional clinical & work environment for your staff and patients.
- ADI is a full line dental equipment dealer, and cooperates with all major Dental Dealers. **No other mobile clinic manufacturer has such a complete line.**
- ADI technicians are factory trained and certified for equipment modification, installation and repair (A-Dec, Planmeca, Beaverstate, Sci-Can, Dental EZ, Belmont, Cattani, Braun, HWH, etc). **No other mobile clinic manufacturer has this level of multi-disciplined cross training.**
- Our specific expertise in equipment modification and adaptation for mobile applications allows for maximum clinical reliability. **No other company has greater experience in this critical field.**
- We are proud to offer our clients extensive training in clinic operation and technical service. Annual refresher courses and onsite training for new staff are also available.
- ADI has experience in remote diagnostics and interactive trouble shooting to minimize down time and keep your mobile clinic up and running.
- ADI assists and advises on financing, program development, operations & logistics coaching, staffing / recruitment, implementation and roll-out. **No other company gives you such a strong commitment to enable your success.**
- ADI designs are energy efficient and environmentally responsible. Our robust mobile clinics help you to reliably deliver outreach healthcare in local and remote locations.
- All ADI Floor Plans are copyrighted® and registered. ADI **vigorously** protects these unique and highly detailed designs.
- Our Cold Weather Freeze Protection (0°F / <-18°C) package allows you to operate and maintain your mobile clinic, even in the middle of the winter.
- ADI recommends and uses hospital grade and aseptic/anti-microbial materials for your interior build-out, providing protection for both your patients and your staff.

Winnebago Industries Commercial Vehicle Shell Specifications

Why Winnebago Industries Commercial Shells?

Winnebago Industries Commercial Shells completed with ADI Mobile Health floor plans offer the most energy efficient and value for cost in mobile health clinics.

The Winnebago Industries Commercial Shell is **not a converted RV**. This vehicle is built for ADI by the Winnebago Industries Commercial Shell division specifically for sustained commercial use.

Manufacturing and construction features:

- Winnebago's patented construction process uses their integral box construction with water tight, strong, interlocking geometry - partition walls are not required for stability.
- Wall & roof frameworks are welded in laser aligned jigs.
- Wall & ceiling units are Structural Insulated Panels (SIP's): an engineered, one-piece laminated system of fiberglass, plywood, and high-density foam with embedded steel and aluminum reinforcements. SIP's deliver unsurpassed strength, insulation, and durability in a lightweight unit.
- Individual wall & roof sections are independently repairable or replaceable if needed.
- The new FRP (Fiberglass) interior wall panels include a standard anti-microbial coating.
- The commercial shell has high insulation values in the ceiling (R25), walls (R19), and basement compartments (R12).
- Flat, full length ceiling geometry with easy to clean and rugged vinyl surface.
- The one-piece fiberglass roof includes a ten (10) year warranty.
- Pre-routed wire paths are installed in the ceiling along with upper & lower chases for cabling runs (CAT6, remote x-ray, audio/video, etc.).
- Full length integral in-wall metal "beltlines" (high, mid, & low) for secure attachment of cabinetry & equipment are standard.
- Upper & lower full-length HVAC continuous sealed ducting is built into the shell to keep the heating system within the thermal envelope.
- A large, roomy, comfortable, walk-thru cab / driver's area includes an all steel roll cage with roll bar.
- On the 33S and 38S the floor is flat throughout the interior - there are no wheel-well protrusions.
- The sub-floor consists of 1- $\frac{1}{8}$ th inch, marine grade plywood with a continuous aluminum under-layer.

- Fully insulated, weather-tight locking basement compartments are included in the base chassis price.
- An easily accessible engine & transmission compartment allows for single point service.
- Includes an extensive North American (USA & Canada) Dealer warranty / service network (Winnebago Industries & chassis manufacturers).
- Winnebago Industries commercial shells provide exceptional quality, comfort, a smooth ride, and superior drivability.
- All electrical wiring is NEC / CSA certified.
- No CDL is required to drive even the largest (WFJ38S) Winnebago commercial shell (CDL max: 11,000 kg for Canada / 26,000 lbs. for USA).

Advanced Dynamo Industries Generators

Advanced Dynamo Industries, an innovative leader in high output, long life generators, designed the 500 Series Mobile Gasoline, Diesel and LPG Generators to be ***compact, quiet, powerful, and easy to maintain.***

Advanced Dynamo Generator Features:

- Advanced Dynamo 500 Series patented generator sets are available in 12.5kw to 20kw, and can be configured for 50 or 60 Htz. Fuel options include gasoline, diesel and LPG (Propane). Other configurations are available upon request.
- All generator sets are rated for up to 10,000 hours (15,000 hours for propane) of continuous duty, which means they can deliver a full load for 10,000+ hours (equivalent to 600,000 miles).
- The easy to read oil and temperature gauges provide ready access to generator information.
- The single sided service design allows for easy access. The generator does not have to be removed to be repaired or serviced.
- Most generator parts are readily available from your local Kubota and Napa automotive stores.
- Advanced Dynamo generators produce very low vibration and sound (less than 63 decibels for the gasoline generator) with multiple isolated motor mounts and extensive use of sound insulating materials.
- The Patented Roof Exhaust and Heat Riser System eliminates the dangers of exhaust and carbon monoxide accumulating under the vehicle and entering the clinic through the entry door or windows. It also draws heat from the muffler and catalytic converter away from the engine, prolonging engine and generator life.
- Advanced Dynamo generators are EPA / CARB Level Four 2020 compliant.
